ICC NAVEGAÇÃO

Aware about the future of our planet, the greenhouse gas emissions is a crucial topic that we need to adress today, in order to ensure a habitable future for tomorrow.

Our ecosystems are suffering a dramatical impact and planet life is threatened.

As a significant source of CO2 emissions, the transport/mobility sector is together with the power generation system, one of the main national emitters (representing 25%) being the sector with the highest emissions growth in the recent decades.

We need and we want to be part of a better future, contributing to the change of this reality.

We are committed to reduce actively our carbon footprint in our daily activities and processes.

SCOPE 1

- Fleet Vehicles
- Waste Management
- Company facilities

SCOPE 2

- Purchased electricity
- Fuel and energy related with activities

SCOPE 3

- Office equipment and services
- Processing and end-of-life treatment of delivered products
- Transport and distribution of final goods

- Replacement of car fleet by clean energy powered vehicles
- 100% Digital documents archive
- Boost recycling
- Teleworking
- Improving transport/distribution system plans
- Raise awareness for sustainability among our co-workers
